

APEX™ Production Control System

Stagecraft Industries' High End Integrated Controller

General Information

The APEX series integrates the control of various motorized pieces of equipment into a single user interface. This series of controller provides real-time system data to the user about all aspects of the hoists including speed, position, and status of the motor drive. This system also allows for the use of multiple interfaces and mobile touch screen panel. This system is compatible with both fixed and variable speed motorized products.

What can APEX control?

- ◆ Line-shaft hoists
- ◆ Self climbing hoists
- ◆ Counterweight assist motors
- ◆ Motorized curtains
- ◆ Variable acoustic banners
- ◆ Projection screens/roll drops
